Period for Reply

**A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM
 THE MAILING DATE OF THIS COMMUNICATION.**

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-29 are drawn to methods for treating a patient having a neoplasm with a composition comprising a first compound having formula I and a second compound of formula II, classified in class 514, subclass 310.
- II. Claims 30 and 31 are drawn to a method for treating a patient who has a neoplasm or inhibiting the development of a neoplasm with a composition comprising a) an inhibitor or protein kinase C and b) a compound of formula II, classified in class 514, subclass 310.
- III. Claims 32 and 33 are drawn to a method for treating a patient who has a neoplasm or inhibiting the development of a neoplasm with a composition comprising a) compound of formula I and b) an endo-exonuclease inhibitor, classified in class 514, subclass 310.
- IV. Claims 34 and 35 are drawn to a method for treating a patient who has a neoplasm or inhibiting the development of a neoplasm with a composition comprising a) a compound of formula I and b) a PRL phosphatase inhibitor or a PTP1B inhibitor, classified in class 514, subclass 310.

Art Unit: 1614

V. Claims 36-39 are drawn to a pharmaceutical pack and composition comprising a combination containing chlorpromazine or its analog and pentamidine or its analog, classified in class 514, subclass 310.

The five inventions are independent and distinct, each from the other as they have a separate status in the art as shown by their different and separate subject matter for inventive effort. Further, a reference, which anticipates any one of the above inventions, would neither anticipate nor make obvious of the other inventions. Each such invention is capable of supporting it own patent. For these reasons, the restriction requirement is proper.

To be complete, applicants' response must include a provisional election even though the requirement may be traverse.

The applicants are required to elect a single invention for examination purposes.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin E. Weddington whose telephone number is (571) 272-0587. The examiner can normally be reached on 11:00 am-7: 30 pm.
